E36

WALK-BEHIND SCRUBBER-DRYER

Compact dimensions, high productivity

The Eureka E36 is ideal for cleaning congested spaces.

Designed to be easy for anybody to use, this scrubber-dryer has compact dimensions, intuitive controls and delivers exceptional performance.

Its 14-liter solution tank and 16-liter recovery tank provide the water flow necessary - directly to the center of the brush - to obtain real results.

The hourly productivity rate of 1.250 m²/h makes this unit particularly suitable for cleaning in applications with a surface area of between 200 and 1.500 m².

Based on your preferences and requirements, the E36 is available with either a power cord (CABLE version) or with a 12V battery (AGM version) that delivers 1 hour and 40 minutes of uptime. The battery version provides greater freedom, allowing you to move around without the restriction of a power cord. It is also possible to install a lithium battery, further simplifying maintenance operations and reducing charge time, for a machine that is always ready for use.

Foldable and easy to transport, the E36 compact scrubber-dryer is perfect for multi-context use, for example cleaning contractors who work on different sites on the same day.

SOLUTION FLOW

Cleaning solution is delivered directly to the center of the brush, ensuring even distribution. The 360 mm brush enables cleaning even in the most congested spaces.

CHROME®

For greater resistance in corrosive environments, the frame and metal components are available in stainless steel.

EASY TO EMPTY

Both tanks are removable and easy to transport by hand, they are designed to be easy to fill, empty and clean.

COMPACT DIMENSIONS

The machine's handle can be folded down making the E36 easy to store and simple to transport, even in smaller vehicles.

LI-ION VERSION

The E36 is also available with a lithium ion battery, which has a longer run time and is easier to maintain than any other type of battery. Furthermore, the exclusive battery charging column significantly reduces charging time.

SAFETY

For added safety the E36 has a starter key. The brush motor and electric circuit are protected by a resettable fuse, which interrupts the power supply should an anomaly occur.

ERGONOMIC

The ergonomic handle helps make cleaning easier and less tiring for the operator. All the machine's features are activated via simple switches, which are illuminated and highly visible on the control panel.

PERFECT DRYING

Reduce the risk of slip and fall accidents thanks to the adjustable squeegee, which delivers perfect drying in every context.

INTELLIGENT DESIGN

The recovery tank, with integrated handle, is easy to remove and comfortable to transport. The water/air vacuum tubes are protected inside the frame and are connected to the tank via a locking mechanism and silicon gaskets.

M - MECHANICAL

MECHANICAL®

Created following the "Electronic-Free" philosophy, the functions of an M line machine are mechanically activated. This ensures the unit is simple to use and easy to maintain, suitable even for inexperienced operators.

VERSIONS

E36 AGM (12V AGM battery, 1 hour 40 minutes of uptime)

E36 LI-ION (12V lithium ion battery, 1 hour 40 minutes of uptime)

E36 CABLE (with a power cord, unlimited uptime)

APPLICATIONS

Restaurants, kitchens, bars, gyms, swimming pools, changing rooms, hospitals, small manufacturing facilities, supermarkets, offices, shops and other small to medium sized surfaces.

SURFACES

Ceramic, marble, cement, linoleum, porcelain tiles, rubber.

	AGM	LI-ION	CABLE
